

---

## What's New (July 2005)

- 512 MB DDR SDRAM standard on all units
- On the better and best configurations, the wireless AirPort Extreme card and Bluetooth board are now built-in

## What's New (September 2005)

- 1.33GHz or 1.5GHz G4 processor
- Faster hard drive
- 8x double-layer SuperDrive
- AirPort Extreme and Bluetooth 2.0+EDR (Enhanced Data Rate)

## Visual Differences

There is a new mezzanine board (shown below in the middle) used with the AirPort Extreme/Bluetooth combo card (shown on the left). The antennas, also shown below, connect to the combo card, which connects to the mezzanine board. Refer to the topic: "Antennas, Mezzanine Board, AirPort Extreme/Bluetooth Card" in the Take Apart chapter for details.
