

## Foreword

Welcome to the 2001 Polaris racing season! Thank you for selecting Polaris as your racing machine.

The enclosed technical information, which is based on our past experience, should be reviewed by your team for machine preparation. Do not feel that these suggestions are a must, but use them as a starting point. This information has been outlined with reference to the sections in our 2001 Snowmobile Service Manuals. You will want to refer to them regularly to ensure correct procedures are followed.

The section index enables the user to quickly locate the component unit section desired. A table of contents is placed at the beginning of each chapter to aid the user in locating general areas of information. Keep this manual available for reference.

In order to provide you with the best support possible, Polaris racing, engineering, and testing department personnel must have timely and accurate data from the field. The weekly racing report form is a valuable source of this data. As a part of the Polaris team, your input is highly valued and *never* ignored.

A Race Report Form is included with this manual for your convenience. We request that you fill out the race forms and return them by mail or facsimile (715)355-8797 within 48 hours after every race. We want to read or hear all of your comments, so feel free to use the back of the form or attach another sheet if necessary. Even if you aren't on the race program, please send us your comments.

At Polaris, we are committed to your racing effort. We wish you the best of luck in the season ahead!
